SUMMARY

CompTIA Security+ certified Computer Science graduate with experience in IT operations, software development, and technical support. Skilled in troubleshooting, application development, and supporting reliable systems in fast-paced environments. Seeking entry-level cybersecurity, IT, or technical operations opportunities.

EDUCATION

Inter American University of Puerto Rico

B.S., Computer Science

Jan 2022 - Jul 2026

Aguadilla, Puerto Rico

- **GPA:** 3.72
- **Achievements:** Dean's List
- **Coursework:** Data Structures and Algorithms, Organization and Computer Architectures, Intro to Java, Intermediate Java, Object-Oriented Programming, Intro to Databases, Web Program with Databases, Discreet Computational Structures I, Discreet Computational Structures II, Databases I, Web Page Development, Logical Programming, Operating Systems, Visual Computing, Teleprocessing and Networks, Software Engineering, Mobile Computing, Programming Language Portfolio

SKILLS

- **Cybersecurity & IT:** Network Security, Access Control, Vulnerability Management, Incident Response Fundamentals, Risk Management, Technical Troubleshooting, System Monitoring, Security Operations Fundamentals, Compliance Documentation
- **Tools & Platforms:** Git, GitHub, JIRA, Confluence, Firebase, MongoDB, MySQL, Visual Studio, PowerBI, Figma, React, Bootstrap, SaaS Platforms, Salesforce
- **Programming & Development:** Python, Java, JavaScript, SQL, HTML, CSS, React.js, PHP, C, C++, C#, Backend Development, Django, REST APIs
- **Cloud & Concepts:** Azure Fundamentals, Software Documentation, Software Development Lifecycle (SDLC), Agile Methodology (Scrum), Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

Microsoft

Technologist Intern

Jun 2024 - Aug 2024

Redmond, Washington

- Selected as 1 of 70 participants from over 2,000 applicants for Microsoft's New Technologists Innovation Academy, a competitive 7-week product development and software engineering program
- Built a location-based web application using React.js, Firebase, React Bootstrap, and Maps API that allowed users to search and view points of interest through an interactive map interface
- Participated in the full product development lifecycle, including ideation, user research, prototyping, UI/UX design, development, testing, and presentations
- Conducted peer code reviews through GitHub and contributed UI/UX feedback sessions using Figma to improve usability and application stability
- Attended workshops on Azure, cloud technologies, cybersecurity, AI, machine learning, and Responsible AI development practices.
- Presented project architecture, scalability plans, and product value to Microsoft executives through formal pitch presentations

iTalent Digital

Software Engineer Support Intern

Feb 2022 - Jul 2023

Remote

- Developed and maintained Java and C++ features for internal analytics and CRM software platforms
- Performed functional testing and documented software defects using JUnit, Confluence, and internal tracking systems
- Assisted with troubleshooting backend platform issues and resolving user access and support tickets
- Developed and executed unit and regression tests to improve application reliability and reduce production bugs
- Collaborated with product managers and UX designers through JIRA and Agile workflows to refine implementation requirements
- Maintained internal documentation and knowledge base materials to support troubleshooting and operational consistency

National Debt Relief

Banking Operations Project Manager

Oct 2018 - Feb 2022

New York, New York

- Collaborated across HR, Legal, IT, and operations teams using Agile workflows to improve process tracking, reporting accuracy, and operational efficiency
- Managed workflow tracking, reporting, and process documentation using Excel and internal SaaS platforms
- Helped improve internal audit readiness by documenting payroll, compliance, and operational procedures
- Identified process inefficiencies and collaborated with business analysts to improve internal tracking and reporting accuracy
- Led cross-functional meetings to gather business requirements and streamline operational workflows
- Identified process inefficiencies and collaborated with business analysts to improve internal tracking and reporting accuracy by over 30%, reducing operational risk and strengthening compliance workflows.
- Led cross-functional meetings to gather business requirements and streamline operational workflows
- Maintained issue tracking and compliance documentation through JIRA and internal audit processes
- Supported compliance initiatives related to FDCA procedures, operational controls, and risk management practices

CERTIFICATIONS

- **CompTIA Security+ (SY0-701):** Issued Jan 2026 | Expires Jan 2029
